

**DATA SHEET**

- **Permits easy monitoring of all input/output signals**
- **Commonly used signals are available through BNC connectors**
- **Integrated battery holder and power supply connection**

The Universal Interface Board can be used with the PLDD-75-9-1, PLDD-120-1-1, PLDD-120-12-20D, PLDD-200-1-1, PLDD-200-12-20, and the PLDD-300-1-20. Its purpose is to allow the user convenient access to all the input and output connections.

The UIB-01 comes mounted on a base plate which also accepts any of our drivers. The base plate will bolt to a standard optical bench with 1 inch center to center hole spacing.
